

# OS<sup>2</sup> Supplier Partner Memorandum of Understanding

## Memorandum of Understanding between OS2 - Public Digitization Association and Ciklum

---

This Memorandum of Understanding (MOU) between OS2 - Public Digitization Association (OS2) and Ciklum (the Supplier) must support the OS2 association's desire for business creation based on the OS2 concept.

Terms and conditions of Supplier's engagement in any OS2 project is specified in the association's Code of Conduct. The Supplier is required to ensure that all code, material, and documentation is registered and licensed according to the standards adapted by OS2. This is only a requirement for the project(s), which the Supplier has compiled and contributed to. Common standards are meant to ensure continuance in development and creation of results in the association.

The Supplier must be committed to the copyleft-demand in OS2 by which the Suppliers all agree to leave the source code open for their customers. Furthermore, the Supplier agrees to distribute potential changes in one OS2-project to any related OS2-projects. Software developed outside of OS2 but which the Supplier wish to add to the association's library, may use more free license forms without the copyleft demand.

The supplier is a partner in the following areas:

- App Development
- Cloud Solutions
- BigData solutions
- Data Lake
- Data Migration and Maintenance
- Support desk services
- QA IT Security, Performance and Manual testing services
- Software development
- Web development
- eCommerce
- UX/UI design
- Umbraco

OS2 will publish development plans to supplier partners, promote collaboration across suppliers and support the supplier's ability to create business by letting the supplier gain insight into the development strategies on which the OS2 community is based.

The Supplier will apply commercially reasonable efforts to keep up-to-date with the technologies that are relevant to the customers when they are based on OS2 results. Furthermore, the Supplier agrees to operate with transparent pricing models so that the customer can compare the Supplier's service with other OS2 supplier partners' services.

Please specify a minimum of 1 local contact person who will be the primary contact between OS2 and the Supplier. Multiple contacts can be added.
